ABOUT ME

I am a Full-Stack Developer who is passionate about technology, has a strong work ethic, with a proven ability to quickly learn technology stacks. I love the continual learning that comes with development. There is nothing more satisfying than finishing a new feature or finally fixing that bug that you have been tirelessly searching for.

EXPERIENCE

Full-Stack Developer

701x Inc. / Fargo, ND / Jan 2020 - Present

Primarily handled front end development for application that integrates with 701x hardware

- Rewrote asp.net MVC application in Blazor(WASM) for offline capabilities.
- Lead developer on application rewrite in React when performance issue arose in Blazor.
- Successfully integrated Capacitor.js in react application to obtain Native Bluetooth capabilities.
- Intergraded Stripe payments with react app.
- Design/implement numerous new features.
- Train/Mentor new team members on codebase, processes.
- Successfully Collaborate with team members.
